**WHY ARE THESE THE FASTEST MOVING BALERS AROUND?**

It's simple. You get uniform bale density throughout the bale — density you need for solid, stand-up-tall bales. Bales that hold their shape and, therefore, preserve hay quality.

If your bales stay round, they shed water better. And since John Deere bales won't flatten or "slouch", there is less bale surface touching the ground to wick-up moisture. Dramatically reducing spoilage.
