**ATTENTION FARMERS**  
Strengthen And Reseal Your Silo With Shotcrete

**STRONGER AND WILL OUT LAST PLASTER**

IS YOUR SILO READY TO BE FILLED WITH GRASS SILAGE?

PLEASE CHECK YOUR FILL PIPES AND DISTRIBUTORS NOW BEFORE FILLING SEASON

S&S Silo Service prepares the silo surface by using a 3,000 lb. pressure washer, thus making the silo moist, making a much better surface to bond shotcrete. After shotcreting, S&S always takes away any roughness by applying a steel trowel finish.

The excellent bonding of shotcrete to the silo will keep out moisture and prevent mold from growing on the side of the silo.

**B.T.U.**

**"BUY THIS UNIT"**, or one like it to store your high-moisture shelled corn and save a lot of energy. With the cool spring and slow start for a lot of corn fields, this may be another harvest season coming up when the corn dries slowly...

In order to avoid hauling and drying costs, let us build a corn storage unit to preserve your valuable grain at 20%-30% moisture.

To keep your stored corn bright and yellow, you must protect it from oxygen and heat. Our 6" thick concrete walls reflect 38% of light beams, resulting in 780 times more heat-resisting ability than steel, and 25 times more insulating power than steel.

Our 6" thick walls have a very low leak potential compared to pre-fab silos of any kind, and a very low maintenance requirement.

**BEFORE SPENDING A LOT OF MONEY FOR ENERGY (B.T.U.'s) TO DRY YOUR CORN, YOU WILL DO WELL TO CONSIDER THE MANY ADVANTAGES OF OUR Poured Concrete SILOS...**

To unload your corn, we can install the simple auger system, the Laidig 43 unloader, or the Flying Dutchman. Lets discuss the options, and what is best for your situation.
