*The Feeds That
Work Overtime*

One of the most important parts of a cow's lactation cycle is the dry period, which can be broken down into two phases. The first phase generally continues for the first four to six weeks, and the second phase occurs during the last two weeks of pregnancy. Special management and feeding practices are needed during these phases, so that your cows will receive the necessary amount of nutrients and vitamins. Master Mix® Dry Cow Feeds are known for their consistency and long-lasting quality during the dry period. That's why we're offering you this special deal, so you can see for yourself just how well our dry cow feeds work overtime.
