Your Complete Headquarters For Sprayers And Parts

HEAVY DUTY SPRAYERS BUILT STRONG TO PERFORM TOUGH

- 200, 300 & 500 Gal. Trailer Models
- 110, 150, 200 & 300 Gal. 3 Pt. Hitch Models

FEATURES AVAILABLE:

- 30', 35' and 40' Booms
- 30' & 45' All Hydraulic Folding Boom
- Quick Tight No Drip Nozzles
- Independent Boom Suspension Eliminates All Boom Bouncing.

At Last! A Reliable, New Stainless Steel AG-CHEM FOAM MARKER Reg. \$869.00 SPECIAL \$830.00

Each Foam Marker Contains:

- Mixing chamber for each boom.
- Drop hoses for each boom.
- Electric harness for in-cab controls (on-off/left-right).
- Hose for boom lengths up to 47'.

The Ag-Chem foam marker offers you efficient operation with a 12 volt compressor that draws only 9 amps. Independent left and right boom markers can be controlled from the cab for on-the-go operation. That lets you operate either boom marker for precise, economical foam placement. And best of all the Ag-Chem Foam Marker produces a dense foam within seconds of agitation, and has a dependable output that can be adjusted for volume.

Use with the new 80-to-1™ high concentrate foam.

Get the CHARGE

Advantage for...

- ALFALFA
- POTATOES
- TOBACCO
- VEGETABLE CROPS

The CHARGE Advantage

CHARGE Liquid Plant Food is a scientifically balanced NPK liquid foliar nutrient, rich in phosphate and containing humus for increased uptake of nutrients.

The 3 Elements of CHARGE 8 • 32 • 5

- ✓ NITROGEN to promote fast growth and abundant foliage
- ✓ PHOSPHATE to encourage seed and root development
- ✓ POTASH which is essential for sugar and starch formation and to increase size and quality of fruit

plus HUMUS, the added benefit for increased nutrient uptake

ALFALFA

Independent research and growers alike have attested to the benefits of CHARGE in increasing the yield on alfalfa. Growers who use CHARGE on their alfalfa have come to expect significant increases in protein level and decreases in Acid

Detergent Fiber. CHARGE has been shown to make a difference in the healthy growth of alfalfa, especially during stressful conditions from weather and pests. CHARGE should be applied at 2 to 4 qts. per acre after dormancy and after each cutting when the crop shows 5 to 6 inches of growth. Get the CHARGE advantage!

POTATOES

Optimum time for applying CHARGE is at tuber initiation, followed by applications at mid and late season. Late applications should be combined with NUTRA-K Liquid Potassium to achieve bulking and increase specific gravity before har-

vest. CHARGE users have achieved bonus payments for potato crops with more potatoes in the desired premium size and for increased weight and yield. Apply 2 to 3 qts. of CHARGE per acre when plants are 4 to 6 inches high. Get the CHARGE advantage!
