The New
ROLLANT 46
SILAGE BALER
With Built-In
Cutting Device From
CLAAS

Call Today For
A Demonstration!

The Rollant 46 can now be supplied with a cutting system based on a rotor design. The benefits:

- Even higher Bale Density
- Easier distribution of bale contents

Self propelled forage harvesters for highest capacities and universal operation

CLAAS JAGUAR self propelled forage harvesters are professional machines. Profitability demands high working quality and high speed of operation. This can be achieved with advanced technology and fully matured machinery. Today's farmers and contractors make competent decisions. These professionals have made the CLAAS JAGUAR Europe's number one.

Now is the time to
schedule your corn harvest
with one of CLAAS
custom harvesters.

COMBINING SLOPES — THE MF 3-D CLEANING SYSTEM

MASSEY FERGUSON

With the MF 3-D cleaning system, the crop is distributed evenly across the full width of the sieves, performance remains stable and output maintained.

The 3-D cleaning system provides dynamic slope compensation which means that the upper sieve moves sideways against the slope of the hill. The degree and direction of these movements depend on the inclination of the slope. Quick reaction and of course equal performance in any direction on slopes of up to 20%.

With the MF 3-D system you can operate at the same speed on slopes as on flat land. Daily performance can be maintained.

3-D in operation
