**B.T.U.**

"BUY THIS UNIT", or one like it to store your high-moisture shelled corn and save a lot of energy. With the cool spring and slow start for a lot of corn fields, this may be another harvest season coming up when the corn dries slowly...

In order to avoid hauling and drying costs, let us build a corn storage unit to preserve your valuable grain at 20%-30% moisture.

To keep your stored corn bright and yellow, you must protect it from oxygen and heat. Our 6" thick concrete walls reflect 38% of light beams, resulting in 780 times more heat-resisting ability than steel, and 25 times more insulating power than steel.

Our 6" thick walls have a very low leak potential compared to pre-fab silos of any kind, and a very low maintenance requirement.

**BEFORE SPENDING A LOT OF MONEY FOR ENERGY (B.T.U.'s) TO DRY YOUR CORN, YOU WILL DO WELL TO CONSIDER THE MANY ADVANTAGES OF OUR POURED CONCRETE SILOS...**

To unload your corn, we can install the simple auger system, the Laidig 43 unloader, or the Flying Dutchman. Lets discuss the options, and what is best for your situation.

16'x68'  
about 10,000 bu. cap.  
Shelled Corn  
Poured Concrete  
No Used Silos!  
No Rebuilt Silos!  
No Preowned Silos!!
