

100%

Comprehensive tests on the retraction speed regularity of irrigation machines were carried out by the French Chamber of Agriculture.

In field tests on farms, irrigation machines of 19 different manufacturers were tested. The BEST results were reached by BAUER Rainstars with Ti Turbine Drive.

100% of the tests showed optimum retraction speed regularity with only 6 psi loss. Uniformity along the irrigation strip is directly dependent on retraction speed regularity. The results of variations found in other makes will mean considerable losses in terms of yields, water and energy consumption.
