Tapered hopper is interlocked then riveted together for strong construction made from 18 ga. steel. No danger of coming apart as spot welded construction. No thin spots as spun tapered hopper. The design must be good since our competition copied it. We don't spin our hopper. When you spin metal you get weak points. This is a critical area since the hogs are rubbing against it. Also, on our leader if one spot does wear through it can be replaced. If a spun hopper wears out you have to replace the entire hopper.

- One-piece seamless spuy cover hinges back for easy filling.
- Front and rear catches hold cover secure.
- 6-piece tapered hopper swaged, then overlapped and riveted together for extra strength. No spotweld to break loose.
- 2"x6" tapered oak skids with heavy 11 gauge skid pulls for easy moving.
- Big 1 1/2" rake edge stops feed waste.
- Large feed opening so there's plenty of headroom for largest of hogs to eat.
- Feed control band double hemmed for strength and made from 16 gauge galvanized steel.
- Two large 18 x 20 recessed drinkers
- Easy clean out with recessed drain plug
- Waterer is lightweight but 10% thicker and 20% heavier than competitors
