The new White 445 Chisel Plow makes complying with residue guidelines and requirements easy. Options like rippled coulters and chisel points set at 15" spacing leave lots of residue. Concave coulters and twisted shovels set at 12" spacing leave less residue. And these are just a few of the combinations available.

Our deep-till shank option rips hardpan by tilling 4" to 6" deeper than chisel shanks. This reduces compaction problems. And our leveling bar option provides a smoother surface for your next pass.

White Row Crop Cultivators are designed for high speed

With nine models, there's a model with the options to match your residue management plans.

ONE
