The CLAAS corn header is in a class of its own, and sets the standard for the industry.

The six row header features folding outer dividers so you stay within 10 foot width. This makes road travel safer standard.

The dividers have a very low profile to ensure that hanging or battered corn can be picked up cleanly and transported smoothly to the compression rollers. The deflectors stop the header from pushing the corn forward and allows cutting of the crop close to the ground.

CLAAS
THE HARVESTING SPECIALIST

Now is the time to schedule your corn harvest with one of our CLAAS custom harvesters equipped with rollermill.

For a baler to produce silage balers, the design must be based on the know-how of a specialist. The CLAAS QUADRANT 1200 shows how silage bales have to look; highly compressed, accurately shaped and securely tied. Baled from wilted crops and then matured in the silage clamp to provide nutritious forage.

More and more farmers recognize the advantages offered by big bale silage; economic efficiency and profitability are ensured and the nutritive value of the farm-produce forage is utilized to the full.

Perkins Lugging Power Gets You Through The Tough Jobs.

When you think of Perkins engines, you first think of descriptions like rugged, dependable, economical and long-lasting. This reputation is well deserved and based on a design principle that has proven to be effective in a wide variety of applications.
