

Dairy Tips By Dr. Randy Lyle, Ph.D.

Purina Mills Dairy Consultant

WHY YOU SHOULD CONSIDER A COMPLETE DAIRY FEED FROM PURINA MILLS

by Dr. Randy Lyle

1. Consistent high quality and high performance

- Purina Mills Quality Control ensures ingredients are high quality, free from molds and foreign material
- Our analytical procedures (NIR) detect variations in moisture, protein, and energy. Formulas are adjusted to deliver the same consistent nutrition... load after load.
- Consistently high palatability
- Pelleted feeds can provide more uniform intakes, when grain is fed in parlors, computer feeders, tie-stalls.

2. We have a broad range of products to meet your needs

- Energy levels ranging from 63% TDN (.68NE1) to 80% TDN (.87NE1), as-is basis, to match your needs and goals

- Protein levels to match your forages, ranging from 14% to 24%.

- An array of options to meet your needs: buffer, whole cottonseed, fermentable fiber, all natural protein or a combination of NPN with natural protein, product form either as pellets, meal, or coarse textured with either cracked or stem flaked corn

3. Service

- When you purchase a Purina Complete Feed, you also receive competent ration balancing, forage analysis, and management guidelines for all phases of your dairy operation.

4. Patented technology

- Our new Supercow Milking Completes are the highest performance complete feeds available, utilizing a patented extrusion process available only to Purina Mills.
