Shaver 3 Pt. Hydraulic Post Drive.....	\$2,500
Brady 12 Ft. Flail Shredder.....	\$5,500

THE CLAAS HARVESTER

MAXIMUM FEED QUALITY

To ensure maximum feed quality from maize it is vital to crack every kernel. Digestion of uncracked maize falls as the maize becomes drier. Independent trials have shown the Claas corn cracker to be close to 100% effective. From the cylinder the corn passes through the two large diameter rollers with saw tooth profiles. The rollers run at different speeds to intensify the grinding effect and open up each kernel. It is a fairly tough process so the latest generation of corn crackers take account of the wear involved on the rollers. Nothing can reduce the wear but Claas have cut the cost of repair by making the outer sleeve replaceable. The shaft, drive pulley and bearings can all be reused which cuts down repair bills dramatically. Adjusting the distance between the two rollers is accomplished by turning two handles, easily accessible behind the cab. In no time at all the degree of cracking can be matched to the ripeness of the crop.

Claas Harvester And Roller Mill

RELIABILITY

The CLAAS Cutterbox is a unique balanced design using 2 knives in a V configuration. This forces the cutting action toward the center instead of the outside. This is the secret of their horsepower requirement and good quality of cut.

WHY SHOULD YOU BUY A NEW MF 399?

12 GOOD REASONS COME RIGHT TO HAND.

The new 12x12 Side Shift transmission puts the shift lever where it belongs — to the right of your seat.

Plus the shuttle lever is on the steering column so you can change directions with your left hand while operating loader controls with your right hand.

The 12x12 Side Shift synchronized shuttle transmission gives you 12 great reasons to come in and test drive a 70-95 hp* MF 390, MF 390T or MF 399 tractor today.

* Manufacturer's rated PTO horsepower.
