Broiler/Fryer Parts

Wednesday, September 15, 1993

Trucklot buying interest continued to be very good for white meat items but was slow to fair and cautious for most dark meat items. Supplies of boneless skinless breasts were tight with buying interest for both pallet volumes and trucklot volumes not filled. Trading was at current prices but the undertone was fully steady. Line run breasts were short of covering commitments and no extra product showed up today. Trading was reported at higher prices. Yellow skin legs and leg quarters were available and buying interest for late week needs was cautious. Wings were short of needs at most locations but a cautious undertone was noted.

In the Central States, prices for nest run breaking stocks trended higher, checks and undergrades were unchanged. Trading and demand was spotty. Offerings were adequate. Supplies were adequate. Available product was held with confidence while buyers bid higher for fill-in needs. The undertone was at least steady. In the South Central States, trading in light type hens was too thin to report prices. Demand was fair. Most plants had sufficient hens from contractual volumes to fill needs.
