CHORE-TIME

THE COMPLETE SYSTEMS PEOPLE: TWO STYLES OF FEEDERS

CHORE-TIME lets you feed broilers your way! That's why we offer two distinct styles of broiler feeder: Model C2™ with grill and Model H2™ without grill.

As the world leader in poultry production systems, Chore-Time offers you the best and most advanced choices for whatever needs you have.

You'll love what both of our feeders do for you:

- **Patented Feed Window** The exclusive Chore-Time Feed Window automatically fills the pan high with feed to attract chicks from day one without extra labor. After brooding, the feed level then goes to a normal, low level to save feed all thru growout.

- **Unique Pan Shape.** Only Chore-Time offers a deep "V" pan shape with Feed Saver features: a unique lip helps stop waste from raking and billing, plus a pan shape that lets you keep feed levels low and still provide birds with plenty of feed for fast gains.

- **Other benefits.** Both feeders have a long list of features, and each has some exclusive features of its own. Find out more about why Chore-Time is the leader all over the world when it comes to broiler production systems.

When the Chore-Time Model C2 feeder line is lowered to the floor, patented Feed Windows pile feed high, to attract chicks.

Model H2 feeder with feed chutes (top photo) lets you start chicks with less labor, than finish them

(left) on the same system. Both H2 and C2 (left), excel at finishing broilers fast on the least amount of feed possible.
