MODEL 6400, 85 HP, MFWD
Power - Performance Reliability

The innovative new 16-speed PowQuad Transmission gives you powershift performance to deliver the right speed choice for any operation. Shift on-the-go into one of four synchronized ranges. Then powershift up or down as conditions require. The smooth, clutchless shifting within each range lets you reach specific speeds quickly to achieve a higher work output.

- \$42,500 (1 ONLY)**

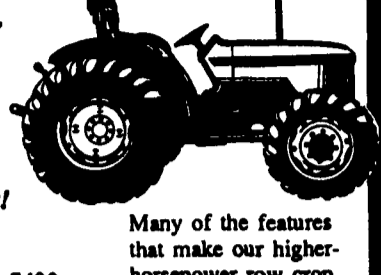

MODEL 6200, 66 HP, 2 WD
The Most Productive In This Horsepower Class!

The new modular frame design reduces stress on the engine and powertrain because the frame carries the load. The result is a stronger, lighter tractor with a better weight distribution and a higher payload capacity than conventional tractors. Plus, the "soft" rubber engine mountings dampen vibration and noise.

The VacuMeter™ is light-years ahead of the Finger Pickup and competitive meters in versatility, accuracy and speed

Improve corn seed spacing up to 17 percent. Seed sown deeper and closer have changed dramatically. To maintain seeding accuracy, you need a seed meter that can meet today's demanding seed challenge. You need the VacuMeter system, offering up to a 17 percent increase in corn seeding accuracy over the Finger pickup system.

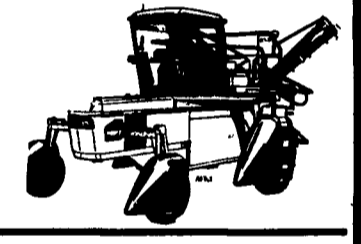

New single-cross varieties of seed vary in shape and size. Because the VacuMeter system uses gentle vacuum pressure to hold seeds in place, it handles all sizes of seed accurately. And VacuMeter accuracy may enable you to reduce planting rates to save on seed costs.

Seeing is believing

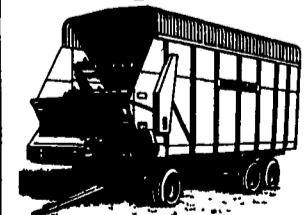

Every minute you can save at the blower means more loads per day and more overall productivity. Let us demonstrate the New Holland Model 40 forage blower and we believe you'll agree you can increase your silage productivity.

The Model 40, with 20 percent greater tip speed than previous models, center fills silos over 80 feet high. The Whirl-A-Feed™ table spins the crop into the blower housing at high speed, making more efficient use of your tractor's horsepower.

See us soon for a demonstration of the Model 40.

Go with a proven winner!

Haul, unload your forage faster

You can unload any crop quickly and efficiently with the new big-capacity Models 816 and 818 forage boxes from Ford New Holland. Roller chain drive provides unloading speeds of 3.0 and 7.1 feet-per-minute. And tough Duraply sides flex under heavy loads for season-after-season dependability. The "816" and "818" unload from the front and come standard with three self-aligned beaters and baked-enamel galvanized roof. For a closer look, stop in and see us about this new forage box.

Total performance for big crop harvesting

You get total performance when you harvest your crops with a Model 900 forage harvester. Total performance begins at the cutterhead. The 12 knives of the 21-inch cutterhead give you uniformly cut, high-quality forage. Other features on the "900" include:

- Optional Metalert® II electronic metal detector—protects cutterhead and your valuable animals.
- Electromagnetic clutches—give instant response in controlling feedroll and attachment drives.
- Easy-adjust shearbar—makes adjustment fast and precise.
