

Maryland Breeders Dominate Mid-Atlantic Jersey Show

HARRISBURG, Dauphin Co. — Waverly Farm of Clearbrook, Maryland, received the banners for premier breeder and premier exhibitor at the Mid-Atlantic Regional Jersey Show, held last week during the All-American Dairy Show in Harrisburg.

The farm also exhibited the reserve champion female, "W F Toptin Slipper," the best senior female bred and owned by the exhibitor.

The 30th annual Pennsylvania All-American Dairy Show ran Monday through Thursday at the Farm Show Complex. About 1,000 head of dairy cattle competed in the Junior Dairy Show on Monday, and 1,700 head of cattle competed in the six open breed shows, vying for \$78,000 in premiums.

The show is sponsored by the Pennsylvania Dairy and Allied Industries Association, Department of Agriculture and Farm Products Show Commission.

The grand champion female of the regional Jersey show was "Pennsmith T J Mindy," winner in the 4-year-old cow class. Mindy was exhibited by Wayne and Alan Stiles, and Billy and Mike Heath of Westminster, Maryland.

The junior champion female and the best junior female bred and owned by the exhibitor was "Bachelors G Gemini Fonette," shown by Max and Steve Bachelor of Angola, Indiana. The reserve junior champion was "Junos Angela of SSF," exhibited by Rock Ella Jerseys of Ontario.

Judging the 270 Jersey entries was Robert Fitzsimmons of East Montpelier, Vermont.

Showing the grand champions of the Mid-Atlantic Regional Jersey Show, are, from the left, Robert Fitzsimmons, judge, Anna Callhoun, state Jersey Queen, Billy Jo Heath, with the grand champion, Mike Stiles, with the reserve grand champion, and Jennifer Grimes, state dairy princess.

1993 MID-ATLANTIC REGIONAL JERSEY SHOW

State Or Provincial Herd: 1. MD Jersey Cattle Club, Westminster, MD; 2. PA Jersey Cattle Club, Liberty, PA; 3. VA Jersey Cattle Club, Clearbrook, VA.

Premier Breeder: 1. Waverly Farm, Clearbrook, MD.

Premier Exhibitor: 1. Waverly Farm, Clearbrook, MD.

Premier Sire: 1. Valley Stream Jis Juno

Prepare For

No matter what you have heard from our competition, Big Dutchman is still Number One, with the best cage system by far. Locally some Big Dutchman systems are approaching their twentieth year of service, and still going strong.

WHOSE FEEDER IS BEST?

DESIGN...Our chain feeder allows easy access to feed, but keeps feed levels further below the lip of the trough compared to the grinding auger feeder. The chain feeder has a steep sidewall, discouraging feed build-up. The auger feeder trough has a slope that allows build-up, inviting mold and disease. Our trough is ribbed, for strength. There is built for price alone.

FEEDING SPACE...Actual feeding space with the auger feeder is skimpy. In fact, our chain feeder has 2 1/2 times more feeding space per bird. This allows the chain feeder to run as few as three times per day, while the auger must run eight or more times per day. Chain carries the feed and supplies a uniform ration with no waste.

FEED CONTROL...The chain feeding system does not dictate a feeding program. You are in control, feeding exactly what is needed, as little or as much as you want, when you want. The auger's frequent running times, with stops and starts, can interrupt birds during peak laying periods.

EGG SIZE and QUALITY...Birds that eat properly lay larger eggs. The price on large vs. medium makes a world of difference. The chain feeder allows an early feeding, then ample time for the hen to lay before the next feeding. With an auger feeder, hens fight for feeding space, spend much more time than necessary at the feeder, and create unwanted activity in the cage. The results are smaller eggs and more crax and chex. Profits go down. Put a pencil on it.

REPAIR and MAINTENANCE...The hardest thing about repairing a chain feeder is remembering where you left the hammer and chain breaker tool some months back. With an auger system the need for a welder, torch and grinder is almost routine. Downtime is up, and repair hours and expenses rise with it.

THE TEST of TIME...The chain feeder seems never to wear out. Some thirty year old units are still performing every day. On the other hand, the auger system is "short term," with time as it's enemy. Our goal is to help you make a profit, and chain feeding pays a leading role.

THE NEW CAGE SYSTEM THE INDUSTRY NOW AVAILABLE ONLY THROUGH

WHOSE CAGE SYSTEM

- Thick PVC dropping boards between decks effectively catches virtually all droppings.
- Specially engineered dual action stainless steel scraper blades scrape boards clean.
- Our feed trough fits snugly on the cage. This provides strength, and protects eggs as they move to the egg belt. The straight inner side of the trough also acts as a manure shield.
- Our cage is designed and constructed to control egg roll, significantly reducing crax and chex and providing cleaner eggs.

THIS SYSTEM ONLY AVAILABLE THROUGH DON'T ACCEPT OTHERS
