

**SEE BINKLEY & HURST BROS. INC. FOR ALL TYPES OF YOUR ROTARY CUTTER NEEDS...INCLUDING OFFSET SLOPE, TURF MOWING AND SHREDDING EQUIPMENT!**

Quality, Dependability, and Performance and three great reasons why the TWISTER family of medium-duty cutters

from **SERVIS-RHINO** is mowing the competition down!

**TW60**

The TW60 mows a full 5' swath and is available in 540 RPM and three-point lift. The TW60 requires only a 30 HP tractor (with adequate front weight) to save on operating costs. The tail-wheel beam of the TW60, 72, and 84 lift-type cutters are easily adjustable for different cutting heights.

**TW72**

The TW72 mows a 6' swath of material and can be operated on a tractor as small as 40HP (with adequate front weight). The floating top linkage of the "A" frame allows the TW cutters to follow the contour of the ground in rough conditions without damage to the hitch.

**TW84**

TW84 Shown with Optional Spring Shock Absorber

The TW84 mows a 7' swath and is available in 540 or 1000 RPM and as a pull- or lift-type unit to fit a wide range of tractors. An optional heavy-duty "A" frame is available for working in demanding conditions. The lift-type unit is available

with one or two tail-wheels and requires a 60 HP tractor (with adequate front weight) while the pull-type TW84 requires only a 30 HP tractor for many conditions. A parking jack is standard on pull-type units.

All Models Shown with Optional Chain Guards (Deflectors Standard)

Markers Optional

There's nothing more important to a crop than early, even emergence. To get it, you need accurate, even seeding.

The 5300 has earned a reputation for its seeding precision, a function of its exclusive feed cup design and dependable disk openers. And, to improve placement of seed, the opener drawbars are heavier than on previous models. Press wheel and opener bearings are heavier for long life operation.

Along with accuracy, the 5300 gives you fast, high capacity seeding, so you spend less time refilling hoppers.
