#### AGRICULTURAL RADIALS

KLEBER TIRE CORPORATION: A MICHELIN TIRE CORPORATION DIVISION!!

For years Kleber has been the European leader in agricultural radials, both in original equipment and replacement sales. Now, that same technology is available in the East

INTRODUCING A NEW FAMILY OF RADIAL FARM TIRES

A front/rear radial tire designed for heavy-high horse power tractors that can improve traction over 15%, while reducing soil compaction! Operating air pressure as low as 8 P.S.I. will dramatically boost your yields

#### EXCLUSIVE BENEFITS BY DESIGN

KLEBER...

What do we say when our customers ask us for the best farm tire we have? (After all, by now he has tried Goodyear, Firestone, Armstrong...). We have a new answer to that old question: Kleber (Pronounced Claybear) Here's why Kleber, a wholly-owned subsidiary of Michelin Tire Corporation has been making radial farm tires since 1952. In Europe (which is 85% radial), Kleber is number one and michelin is number two in both original equipment and replacement farm tires. The immediate benefits farmers will have are: 1. Tremendous traction-after all, Kleber is a minimum of 28% deeper in non-skid. For example, a Kleber

- 18.4R38 is 64/32nds vs. 51/32nds on any commodity radial made in the U.S. The exclusively patented innerlug system accelerates cleanout, reduced downtime and supplements
- The unique carcass and belt configuration allows
- directional stability on the highway even with center hitch equipment. After all, Kleber is designed for road use. It is, in fact, speed rated at 25 mpl
- 4. And last, in addition to the normal benefits of radials, Kleber's wear is so extended that we have product on main tractor application with ten years of service in 8,000 hours.

#### WHY KLEBER RADIAL FARM TIRES? · Lowest Cost per hour

- Highest traction wet or dry
- Quietest highway transport
- Smoothest ride no bounce
- Greatest fuel economy
- Most stable center hitch haul
- Lowest uniform soil compaction

#### Fastest wet soil clean out

## WHAT ARE THE UNIQUE FEATURES THAT MAKE KLEBER HEAD AND SHOULDER ABOVE THE COMPETITION?

- Dual angle beed configuration to insure no slip rim grip · Bead/sidewall/belt package that provides on/off highway stability
- · Non-stretch belts that reinforce the premium bar depth while protecting the radial
- carcass from field hazards Advanced R-1W ber depth to provide extra traction and low cost/hour usage
- Non-stretch belt/carcass design to minimize soil compaction, eliminate pressure
- spikes and provide uniform wear pattern
- Total design/build techniques to insure stable no bounce ride with center hitch equipment at 45 KPH
- Noise/vibration engineering to optimize bar contour/spacing
  Close technical ties to all tractor manufacturers in the Western World
- insuring compatibility
- Extensive front wheel assist OE/replacement knowledge world-wide
- In-house research development staff
