BIG YEAR END REBATES

If Your Fields Are Rocky, You Need To Own A Heavy Duty Rock Rake With Replace Wear Paddles. Note, They Work Well Enough To Prepare Large Landscaping Projects.

ROCK RAKE

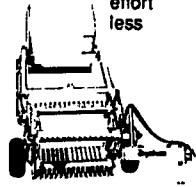

The Degelman Rock Rake is designed to windrow small to medium sized rocks and other ground debris for easy picking. Rock-free fields mean less down-time, greater profits.

Now!**

ROCK PICKERS

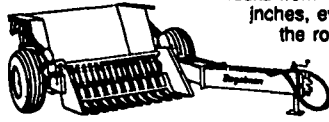

Hi-Lift
The Hi-Lift makes field piling and the removal of rocks by truck simple and effort less.

Semi-Hi
A handworking reel type picker ideal for field piling. Picks gravel-size stones to boulders in continuous picking action, then dumps them conveniently and easily.

Prong Type

Man handles rocks from 4 to 36 inches, even on the roughest terrain.

TIME IS MONEY

and when your equipment is down, it costs you plenty.

That's why Degelman engineered farm implements are a wise investment.

**If It's Snow Removal Or Heavy Duty
Excavating, You Need A Rhino Blade From
Binkley & Hurst Bros. Now!**

For over 50 years, Rhino has been manufacturing the leading line of rear-mounted blades. Throughout this time, our expertise in design and manufacturing techniques has enabled us to satisfy over 300,000 blade owners across the country. Over the years, we have expanded our manufacturing technology in order to continue building RHINO blades with superior craftsmanship and innovative designs. This dedication for quality assures you of the best when you buy a RHINO blade. Today, our investment is paying off for you.

Moldboards. An important factor in the performance of RHINO blades is the precision-formed moldboard with the exact curvature necessary to achieve maximum penetration. This added precision allows RHINO blades to cut and roll the soil rather than dragging, which saves time, horsepower, and fuel. The 1540 with 8' moldboard is available for tractors rated to 190 PTO HP and with 10' moldboard for tractors rated to 160 PTO HP.

The Rhino 900 and 950 blades are both available to be equipped with several sizes of moldboards for your specific job requirements. For tractors rated to 125 PTO HP, the 900 and 950 are available with a 7' or 8' moldboard. For those with tractors rated to 95 PTO HP, a 7', 8', or 9' moldboard is available. The cutting edges of all RHINO blades are 1/2" x 8" high-carbon steel, grader cutting edges. The cutting edges have off-center countersunk bolt holes which give you full life of the blade without wearing into the moldboard, and you don't have to reverse the cutting edge in order to gain maximum life. Unlike some center-punched blades, the off-center punch enables the cutting edge to assume the same curvature as the moldboard,

allowing a free upward flow of dirt. This unrestricted flow produces less drag, with better fuel economy. That is, the dirt slides upward and breaks at the top of the moldboard. The Rhino cutting edge is the same as used on many motor graders. RHINO blades are designed with the strength, ruggedness, and movements to do many jobs of a motor grader quickly and easily. You will be proud of the volume of material that you can move with your tractor and a RHINO blade.
