Dupont Introduces Herbicide Stewardship Program

make this stewardship effort suc-

cessful and to provide tools which

help farmers manage the profita-

many state corn growers associa-

tions and their members, the Soil

Conservation Service, and state

and local farm organizations to

develop broad understanding of

DuPont also is working with

bility of their operations.'

WILMINGTON, Del. Pont Agricultural Products has announced a new stewardship program, called "Working With The Best," for its "Extrazine" II corn herbicides and its "Bladex" corn and cotton herbicides for the 1994 use season.

A number of voluntary changes have been made in the labels of both products. These involve maximum rates and requirements for correct use and application.

"What we basically are doing," said Deborah Freerksen, triazines stewardship manager, "is introducing a number of best management practices that will enable farmers to better protect the environment and ensure the continued availability of these highly effective, economical crop production tools."

DuPont is putting the finishing touches on an extensive program aimed at working with farmers, DuPont authorized retailers, and applicators. This program, "Working With The Best," will be introduced during the next few

"We're committed," Freerksen said, "to working in partnership with our customers and others to

MiraFount THE NEW

NO GAS • NO ELECTRICITY • NO FREEZING

LIKE A NATURAL SPRING IN YOUR FEEDLOT

NEW MODEL 3310 6 Gallon Capacity

Year round waterer for all sizes of hogs. Sphere shaped on the underside of lid.

NEW MODEL 3360 23 Gallon Capacity

24"Wx36"Lx18"H w/(2) 8" drinking holes.

Unconditional 5 Year Guarantee

Saves 100% Of Your Utility Costs - No Electrical Wiring - No Thermostats No Heat Elements . Easy To Install . Easy To Clean Less Water Waste - No Lide To Be Broken Off - No Rusting Years Of Dependable Service

the best management practices.

These practices are similar to the use modifications for atrazine products that were introduced during the 1993 season.

They include maximum use rates, encouraging conservation tillage, and use of buffer strips and setbacks to protect rivers and streams, ponds and lakes, and wells and groundwater from sediment, nutrient, and pesticide runoff.

DuPont has several research studies under way to quantify the effectiveness of the best management practices and is seeking ways to improve them as new knowledge and technology become available.
