

Klines Host Dairy Open House

ELVERSON (Berks Co.) -Ease of milking and speed of handling extra.cows were some of the reasons that Lynn and William Kline invested in an extensive array of improvements and additions to their 200-head grade Hols-

tein dairy farm recently.

The Klines recently invited farmers to tour their new facilities as part of an Open House celebration to feature the new buildings and equipment.

The Kline dairy purchased a new Alfa-Laval Agri double-6 herringbone parlor.

Various companies involved in the renovations at the Kline dairy were on hand to answer questions at the open house recently.

The Klines installed a new milking center, which includes a new milking parlor. The center is a 39-foot by 39-foot Lester preengineered building with Glasbord walls, put in place by Valley View Construction, Inc. in Morgantown. In the new Milking Center is a new Alfa-Laval Agri double-6 herringbone parlor with Blue Diamond suspended stalls with indexing rail. The milking system includes plate cooler, take-offs, and milk meters, by Alva-Laval Agri, and installed by J.B. Zimmerman. A Dari-Kool 2,000-gallon capacity stainless steel milk tank was installed by Lancaster Dairy Farm Automation, Lititz.

The freestall barn has slatted floors and measures 48 feet by 133 feet. It contains an 8-foot deep manure pit and a 24-foot by 40-foot holding area. Lapp's Barn Equipment, Gap, installed the gates, headlocks, freestalls, cow mats, and curtains. Keystone Concrete installed the waffle slats.

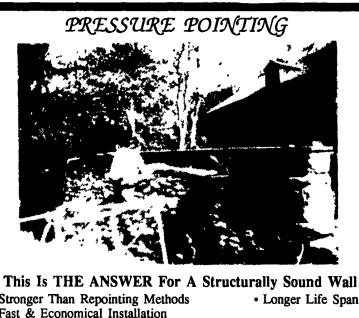

Groffdale Concrete Walls installed the poured walls for the manure pit.

Star Silo, Myerstown, also put up a 24-foot by 96-foot poured concrete silo. Other renovations were also made.

Construction of the new additions began in March and much of the operation in August this year.

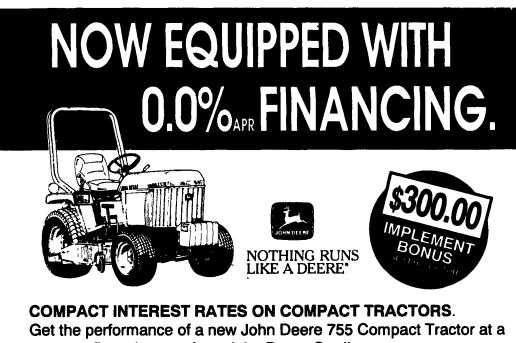

The Kline farm has about 102 milking cows, grade Holstein, with about 98 replacement stock. Milking average on the herd totals about 19,000 pounds. All cows are milked through the new parlor.

A dinner was provided for those who attended the open house.

• Longer Life Span Stronger Than Repointing Methods Fast & Economical Installation

- compact financing rate from John Deere Credit. 20 horsepower,3 cylinder engine,15 PTO hp.
- Hydrostatic transmission with dual pedal control.
- Fast, on-the-spot financing with low monthly payments.
