COUNT ON IT.

You can count on Pioneer® brand hybrids to consistently deliver proven performance year after year. No matter how different your soil types, moisture levels, disease pressures, tillage practices or individual management goals. We'll help you find the hybrids that best fit your needs. And we'll help you make the most out of the corn acres you plant. So ask your Pioneer sales representative today for the numbers that count.

3293
114 CRM

Top-end yield potential. Exceptional early growth. This hybrid features outstanding stalks, superior staygreen and very good drought tolerance. Above average grain appearance and grain protein content.

3394
110 CRM

Record setting yields and exceptional agronomics. This exciting hybrid combines traits corn growers want: impressive early growth, strong stalks and roots, exceptional stress tolerance, above average drydown and lengthy staygreen. Widely adapted to varying soil types, tillage methods and populations.

3525
106 CRM

The performance leader in this maturity. 3525 is a widely adapted, stable, high-yielding hybrid. Tall plant type, excellent for grain and silage. Late flowering will limit northward movement. Good ear flex and ear attachment. Strong performer under stress.

Comparative Relative Maturity (CRM)

With no industry standard for maturity ratings, comparing maturities between companies is usually difficult. Use this rating to compare Pioneer hybrids with competitive hybrids of similar maturity and harvest moisture. These ratings are based on customer side-by-side and research comparison experience. Individual company ratings may still show a variation from the average comparative rating.
