Owners say:

"Tight bales, fast, no trouble"

- We offer interest-free financing
- Ask us about our rental program
- Let us arrange a demonstration for you

MYTH NO.3

"Variable chamber balers have less spoilage."

FACT: No other round baler on the market can match the low spoilage rates of a Claas fixed chamber baler. That means, on a 50 acre field, you would average 13 tons more spoilage with competitive variable chamber balers. Fact is, the more edible volume per bale, the less bales fed per animal. And that means more efficient feeding.

HYDRA-SPREAD

HYDRAULIC PUSH-OFF MANURE SPREADER

Single or two beater designs. Aggressive, high-speed beaters - with up to 15 paddles per beater - deliver a fine uniform spread. Replaceable bolted paddles on main beater.

Snug-fitting end-gate controls sloppy or granular manure

Polyethylene sides and bottom containing 90% re-cycled material. Guaranteed for the life of the spreader.

Simple and reliable single-stage push gate for dependable, trouble-free unloading. Centre-guided design eliminates jam-ups

Optional slurry pan prevents spills. Controls sloppy or fine materials for even finer more uniform spreading.

Optional weed rails - increase capacity and protect the box.

Precision metering valve for infinitely variable unloading from 0 - 8 fpm

Fully shielded PTO with overload protection

Simple, dependable power train. Every shaft (even the upper beater) is splined for efficient power transmission and long life

Truck type or flotation tires to suit your needs

Clean design. No obstructions to hold manure

Strong, all-welded frame with heavy structural tubes. All structural members are high-strength steel

Driveline and gearbox are safely contained within the frame - under the floor. Easily serviced and repaired

Hydraulic cylinders are installed above the floor. Always accessible - always easy to clean and service
