There's nothing more important to a crop than early, even emergence. To get it, you need accurate, even seeding.

The 5300 has earned a reputation for its seeding precision, a function of its exclusive feed cup design and dependable disk openers. And, to improve placement of seed, the opener drawbars are heavier than on previous models. Press wheel and opener bearings are heavier for long life operation.

Along with accuracy, the 5300 gives you fast, high capacity seeding, so you spend less time refilling hoppers.

Model 1680 PIT PAL®

- AGITATES** — PIT PAL's heavy duty pump has the power to agitate a pit, mixing those heavy bottom solids into a pumpable slurry.
- CHOPS** — PIT PAL'S unique intake-port design provides constant chopping action — up to 5,000 'shearing action' cuts per minute. This cutting action guarantees that straw and fibrous material will be chopped into a pumpable form.
- PUMPS** — PIT PAL'S handy gate valve permits agitating and/or pumping of 'under-barn' or outdoor manure pits. PIT PAL is portable, giving you the flexibility to use it in many locations.
- LOADS** — Load your slurry wagon by combining your PIT PAL to force feed a vacuum tank or over the top with a load stand
- PRIMES** — PIT PAL will operate as a priming system for your high pressure irrigation pump
