

N.Y., N.J. Farmers To Receive \$13.44

ALBANY, N.Y. — Dairy farmers who supplied regulated milk dealers (handlers) under the New York-New Jersey marketing orders during November 1993 will be paid by handlers on the basis of a uniform price of \$13.44 per hundredweight (28.9 cents per quart).

The price for the corresponding month last year was \$12.94 per hundredweight, according to Market Administrator Ronald C. Pearce, who also stated that the price was \$12.83 in October 1993.

The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The seasonal incentive plan has been suspended for 1993. If the plan had been in effect, the remainder of the monies deducted in the spring months plus interest earned would have been returned in the November uniform price calculation.

A total of 11,798 dairy farmers supplied handlers regulated under the New York-New Jersey marketing orders with 881,123,147 pounds of milk during November 1993. This was an increase of 2.1 percent (about 18 million pounds) from last year. The gross value to dairy farmers for milk deliveries was \$119,914,482.97. This included differentials required to be paid to dairy farmers but not premiums, deductions authorized by the farmer, or assessments.

Regulated handlers used 391,062,849 pounds of milk for Class I, 44.4 percent of the total. This milk is used for fluid milk products such as homogenized, flavored, low test, and skim milks. For November 1993, handlers paid \$14.32 per hundredweight (30.8 cents per quart) for Class I milk compared with \$14.70 a year ago.

Handlers used 151,231,769 pounds of milk for Class II products, 17.2 percent of the total. Class II products include fluid cream, egg nog, ricotta and cottage cheeses, ice cream, and yogurt. Handlers paid \$13.42 per hundredweight for this milk.

The balance (338,828,529 pounds or 38.4 percent) was used to manufacture Class III products including butter, cheese other than ricotta and cottage cheese, and dried milk. Handlers paid \$12.81 per hundredweight for this milk.

The uniform price is based on milk contain-

ing 3.5 percent butterfat, each one-tenth of one percent that the milk there was a price differential of 6.4 cents for the 3.5 percent standard.

LEESPORT (Berks Co.) — National average price support rates for 1994-crop soybeans and minor oilseeds were announced recently by the Agricultural Stabilization and Conservation Service (ASCS). The rates are \$4.92 per bushel for soybeans and 8.7

cents per pound for each type of oilseed.

ASCS official Richard Troutman said the soybean and minor oilseed rates vary among counties. "The loan rate that applies to a specific quantity produced is based on the county where that quantity is stored," he said.

For warehouse-stored loans, Troutman said the Commodity Credit Corporation may apply premiums and discounts to the rate to reflect the quality factors of a given quantity placed under loan. County loan rates will be announced later.
