Pennsylvania Forage Schools

Pennsylvania Forage Schools
Penn State Cooperative Exten-

sion is offering a new two-day school in 1994 on forage production at two locations in Southeastern Pennsylvania. On February 8 and 15 from 9:30 a.m. to 3:00 p.m., the sessions will be held at the Lebanon County Extension office, and on February 9 and 16, the same program will be offered at the Gap Diner, Routes 41 & 30, in Gap, PA. This is a workshopstyle program targeted at progressive farmers and agri-business personnel working with forage producers.

Over the two-day period, eight different speakers will address the following topics:

- + Importance of Forages to
- Pennsylvania + Forages and the Ruminant
- Animal + Forage Fertility and Manure
- Management
  + Forage Crop Selection and
  Establishment
  - + Forage Insects
- + Forage Weeds and Their Control
- + Forage Quality: Determination and Importance
- + Hay and Silage Harvest Management
  - + Dairy Forage Systems
  - + Forage Economics

The cost of the school is \$45.00 which includes the "Pennsylvania"

Forage Handbook," an extensive reference book, and meals on both days. For more information and registration, contact Paul Craig (717-921-8803) for the Lebanon County school and Walter Wurster (215-696-3500) for the school at Gap. Attendance will be limited to 40, first come-first served.

Dairy Nutrition

Teleconference and Workshop
Chester County dairy farmers
have the opportunity to participate
in an excellent three-day dairy
nutrition program at the Lancaster
Farm & Home Center February
10, 17 & 24 from 10:00 a.m. to
3:00 p.m. each day. The workshops are designed to combine
hands-on activities with local
extension agents and interaction

with university faculty via satellite. Producers will be able to use information from their own farms to expand and update their knowledge of nutrition and feeding management. This is a very up-todate program that uses the expertise of a variety of university faculty to cover all phases of feeding dairy animals.

The cost for the three days is \$46.00 which includes the workshop book and three lunches. For more information, contact Glenn Shirk (717-394-6851) or Walter Wurster (215-696-3500). Registration is being handled by the Lancaster County Extension office.

## NRAES Co-op Extension Offers Milking Center Book

ITHACA, N.Y. — In November 1992, more than 400 persons attended the National Milking Center Design Conference held in Harrisburg.

Now available is *Milking Center Design*, NRAES-66, the 312-page proceedings of this conference. Dairy farmers, farm advisers, veterinarians, cooperative extension agents, lenders, milk inspectors, sale personnel, and anyone involved in milk production may want this book.

The proceedings include 35 papers that cover all aspects of milking center design and construction. The papers are divided into eight sections.

The "Planning a Milking Center" section discusses economic and financial considerations as well as putting together a planning team.

Sections titled "Parlor Efficiency" and "Parlor Selection" provide information that will help decide the type of parlor that is right for a particular farm.

The "Keeping it Clean" section

discusses regulations; water needs; cleaning requirements; and controlling, treating, and disposing milking center wastes.

The proceedings are rounded out with sections titled "Data Collection," "Worker/Animal Safety

and Comfort," "Walls and Wiring," and "Milking Systems." This book is filled with illustrations and tables that provide information essential to designing a profitable and efficient milking center.

The conference program was planned by Stephen Spencer, professor of dairy science, and Robert Graves, professor of agricultural and biological engineering, both from The Pennsylvania State University. The authors include industry representatives, agricultural economists, agricultural engineers, animal scientists, and farm advisers from around the country.

Milking Center Design, NRAES-66, is available for \$25 from the Northeast Regional Agricultural Engineering Service (NRAES), Cooperative Extension, 152 Riley-Robb Hall, Ithaca, NY 14853-5701.

The price includes postage and handling for U.S. orders only; foreign orders must be prepaid in U.S. funds.

Quantity discounts are as follows: 10-49 copies, \$20.00 per copy; 50-99 copies, \$17.50 per copy; and 100 or more copies, \$15.00 per copy. Please make your checks payable to NRAES, or call (607) 255-7654 for more information. Call or write for a free publication catalog.

scheduled four educational meetings in January:
Tuesday, January 18, 1994
7:30 p.m.
Owen J. Roberts High School

annual re-organizational meeting

on December 14, 1993. Dan Mill-

er, Chatham, was re-elected Presi-

dent and Kelly Freebery, Oxford,

was congratulated on her excellent

job as Treasurer, the position she

will continue to hold. Pete Miller,

Spring City, was elected Vice-

President and will direct contact between the Board and the techni-

cians. Glenn Ranck, Cochranville, will serve as Secretary in 1994.

Farmland Assessment
Progress is being made on having Act 319 assessments calcu-

lated for each tax parcel of 10 acres or more in Chester County. At the present time, the mapping

on the computer of the tax parcels

and their soil types and tree cover

is just about complete. Very short-

ly a farmland value will be calcu-

lated for every soil type in the

county and each farm will then

have an Act 319 assessment on the

land based on the combined soil

Around the beginning of Febru-

ary, the assessment office will

send to all farms a statement of

what Act 319 value would be if

that farm elects to select that prog-

ram between March 1 & June 1. If

you are currently under Act 515,

that assessed value will also be on

the statement along with the fair

market value. The important fact

is that you will now have some

choices available for you to decide

which program is best for your

All farmers have some impor-

tant decisions to make if they want

to take advantage of reduced

assessment and taxes on their

farm. To help landowners under-

stand their options, the county has

types on that farm.

Wednesday, January 19, 1994 7:30 p.m. Unionville High School

Thursday, January 20, 1994 1:00 p.m. Honeybrook Fire Hall

Thursday, January 20, 1994 7:30 p.m. Octorara High School

The assessment options will be explained by Walter Wurster, Chester County Extension Agent, and Robert Barr, A farmer and president of 21st Century appraisers. There will be plenty of time
