## Low-Cost FURST FLEXIBLE TINE HARROW

Original "Spreading Action"® tines give better coverage at much higher speeds. Adjusts without tools to provide the right penetration for a big variety of jobs!

**PASTURES:** Increases quality and quantity of feed from pastures. Aerates to stimulate growth and improve moisture penetration. Scatters droppings, reducing parasites. Prepares soil for overseeding without disturbing existing growth. Works in seed and fertilizer. Many owners report pasture yield increases of 15%.

**MADE IN U.S.A. - MOST MODELS IN STOCK**

**HERBICIDE INCORPORATION:** Independent research using black light photography proves the Furst Harrow behind your disk or cultivator gives you "near perfect" incorporation in one pass--better than implements costing several times more! Shreds trash as it prepares & levels seedbeds.

**BROADCASTING SMALL GRAINS AND GRASSES:** University of Illinois found overseeding by broadcasting followed by a Furst Harrow a superior combination, out-performing equipment costing more than 10 times as much. Pulled behind the broadcaster, it covers seed to desired depth in one time-saving operation.

**SHREDS STALKS:** Shreds and spreads stalks in spring ahead of no-till and ridge-till planting.

4 to 42 ft. widths. Flexes to cover every inch at 6-8 mph. No maintenance. Easy to use and store. Insist on the original "Spreading Action"® tines.

## Swing Away

Designed and built for longer lasting performance

CAPACITIES UP TO:  
\*3200 Bushels/hr for 8" Auger  
\*8800 Bushels/hr for 10" Auger
