**FAST!! Emergency Power from a superior PTO Alternator designed with landmark innovations.**

When a "power out" situation occurs, you want power right away. Katolight gives it to you. As fast as you can hook up the PTO shaft to your tractor and connect and throw the transfer switch, you can be operating normally... FAST!!

Katolight innovations make this speedy operation possible. Let's take a closer look at some of them.

**Speed Monitor Light**—permits you to easily maintain proper speed. Because our speed monitor light is a solid state device (the only one in the industry) it is not subject to the vibration, moisture, heat and cold that can make a voltmeter (found in most competitive machines) difficult to operate. Our speed monitor light is easy to operate, which means time saved for you in an emergency situation.

**Full load connectors**—permit quick and easy hook up to the transfer switch. Katolight's models are all UL approved. It only fits one way, thus reducing your chances of making a time consuming error during an emergency situation.

These are just a few of the many manufacturing innovations that have enabled Katolight to pace the industry. And innovative engineering continues to mark the path of the Katolight PTO line in all phases of its design to produce emergency power for you when you need it... FAST!!

**5-Year PTO Warranty. The longest in the industry.**
