New Dynashift™ gives you the best features of both a manual and power-shift transmission.

Dynashift gives you 32 forward and 32 reverse gears by the unique combination of a 4-speed powershift with an 8-speed synchronized gearbox and a synchronized forward/reverse shuttle.

MASSEY FERGUSON

COMBINING SLOPES — THE MF 3-D CLEANING SYSTEM

3-D in operation

With the MF-3-D cleaning system, the crop is distributed evenly across the full width of the sieves, performance remains stable and output maintained.

The 3-D cleaning system provides dynamic slope compensation which means that the upper sieve moves sideways against the slope of the hill. The degree and direction of these movements depend on the inclination of the slope. Quick reaction and of course equal performancein any direction on slopes of up to 20%.

With the MF 3-D system you can operate at the same speed on slopes as on flat land. Daily performance can be maintained.
