Comes From Binkley & Hurst.

Case International 4800 and 4900 field cultivators cover up to 52 feet with every pass through the field. But even with this great width, tillage precision remains its level best.

First, there's simple fore-and-aft leveling to match tractor to cultivator. A unique self-leveling hitch keeps the unit level regardless of the working depth. Positive, mechanically-maintained depth control also means uniform working depth from side-to-side...all day long.

Moving the 4800 or 4900 from field to field is easy, too. Hydraulically controlled wings fold past center for extra stability and security during transport.

Put Case IH precision to work in your fields.
