## 1994 Pennsylvania Machinery Custom Rates

Kimberly A. Hopple Agricultural Statistician

The custom rates shown are averages from voluntary reports by custom operators throughout Pennsylvania. Most of the rates are stated per acre, cwt., ton, bale, or bushel rather than per hour to reduce the variation due to machinery size. Individual rates vary due to differences in working conditions, services performed, or even the operator's eagerness to do custom work. Therefore, the average rates shown should not be considered absolute indications of fair charges.

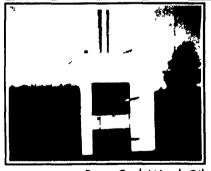

Acreage rates are shown separately for two regions of the state, labeled "Mountain" and "Valley." The differences in rates between regions reflect differences in terrain, soils, and alternative opportunities for the labor and equipment used. Figures labeled "The State" represent the straight average of all reports used regardless of geographic

Custom rates are slightly higher this year. Of the 68 rates reported, 50 percent have increased, 43 percent have decreased, and the remaining 7 percent are the same as last year. The overall average is up 2 percent from the previous year. This percentage increase was computed by adding the rates for all jobs, regardless of basis of charge, and dividing by last year's comparable total.

#### CUSTOM RATES: SELECTED FARMING OPERATIONS, PENNSYLVANIA, 1994

#### -----Harvesting-----

JOB	BASIS OF	MOUNTAIN	VALLEY	STATE
	CHARGE	SECTION	SECTION	
Corn Picking	Acre	\$20.20	\$19.60	\$19.90

"The Natural Way To Heat Your Home"

Burns Coal, Wood, Oil or Natural Gas FUEL USED IN STANDARD UNIT: WOOD & COAL & WOOD BY-PRODUCTS (SAWDUST, PAPER, ETC.) FUEL USED IN MULTI-FUEL MODEL: SAME AS ABOVE INCLUDING OIL, PROPANE, NATURAL GAS

> Efficiency Rating 83% to 85% - Cut Emissions by 90% Year Warranty Except Electrical Components (1 Year) 35 Years Heating Experience

PROUDLY BUILT IN INDIANA COUNTY, PENNSYLVANIA 100,000 - 500,000 BTU 36"-60" Fire Boxes

- ★ The only outdoor furnace made with a Catalytic Combuster. ★ Mahoning Catalytic Combuster Will Help In The Following Ways:
- 1 Burn one cord of wood which
- equals 166 gallons of oil. 2 Your fuel source becomes enormous inexhaustible and noses few
- risks to public safety.

  3 Overall efficiency of 85% which means the heat no longer goes up the chimney!
- 4 You get more heat from a log compared to the non-cat furnace.
- 5 More burn time less reloading time!
- 6. Zap 90% of pollutants, made from fire source
- 7. Saves you a lot of money!
- 8. User friendly, emits no smoke!

## **Alfalfa Question:** Do you have to sacrifice yield and quality to get winterhardiness?

# The Answer:

CimarronVR and Belmont varieties stand-up to cold weather and harsh winter conditions — without sacrificing yield or quality!

These varieties can be harvested earlier in the spring and later in the fall to give higher yields, and a more even distribution of yield over the season. And because they are vigorous, they can be cut more frequently to give softer, leafier hay.

Why settle for late-starting, slow-growing, short-season alfalfa. Choose Cimarron VR or Belmont – premium alfalfa varieties that not only provide excellent winterhardiness, yield and quality - but also combined resistance to all the major diseases, insects, and nematodes that attack alfalfa. Proven performance.
