A Revolutionary Approach To Pressure Washing

**Cut your cleaning time in half with
the famous Dirt Killer Nozzles**

The DK Cleaning Nozzle

The Dirt Killer is the ideal cleaning nozzle. With its unique, high-speed, spinning head it gives a less powerful machine the impact of larger, more powerful industrial pressure washers. The DK, unlike some rotary nozzles, leaves no unsightly pressure washing lines on the surface it is cleaning and it is safe for use in sensitive

industrial areas. Some uses include brick restoration, paint and graffiti removal and deck cleaning. When you don't need a water blasting nozzle, but want high performance cleaning, turn to the DK from Dirt Killer.

The IDK Water Blasting Nozzle

The Industrial Dirt Killer is the world's most powerful cleaning nozzle. It also features a spinning head, which moves at a much slower speed to produce large water droplets that deliver a devastating blasting force. The IDK has the ability to attack and thoroughly clean 3-dimensional surfaces such as concrete

and steel. Difficult cleaning projects, such as crab pots, hog confinements, farrowing crates, milk barns and many others, are made easy with this incredible tool. For the toughest industrial pressure washing applications, ask for the IDK from Dirt Killer

USE IT ONCE YOU'LL NEVER PART WITH IT!

Service Advisory:

Using a Hi-PSI Filter increases the life of the DK & IDK. When using hot water we strongly recommend that you use the Hi-PSI Filter and lubricate the nozzle every 2-3 hours with a teflon blended oil.
