RDM DISC MOWERS

Rhino disc mowers feature an easy access cutterbar. The innovative design of the cutterbar allows access to the disc spindle shaft and gear module without disassembly of the entire cutterbar, reducing maintenance costs and downtime. The hardened rack guards are designed to help protect the entire leading edge of the cutterbar from damage and, along with the skid shoes, are easily replaceable. A heavy-duty CAT I-II & Cat II offset three-point hitch made of 4"x6" thick-wall tubing, is standard to provide dependable service. A safety breakaway system is built in to provide minimum protection against sudden impacts when mowing. With 5' of blade overlap and blade tip speed of 15,814 FPM, Rhino disc mowers provide a clean, smooth cut. Rugged construction and high performance are two reasons Rhino disc mowers are the ideal choice for fast, efficient grass mowing.

The innovative design of the cutterbar allows easier access to the disc spindle shaft and gear compared to some competitive units. The gears run in an enclosed oil bath for constant lubrication. The blades are reversible and easily replaceable for lower maintenance costs and minimal downtime.

The new Rhino RDM Series Disc Mower is designed for faster, efficient mowing of grass pastures and hay meadows and offers features not found on many competitive units.

The cutterbar can be easily raised to the transport position hydraulically from the tractor seat. A parking stand is standard for easier unit storage and "hook-up".

SM/SH TILLERS
