**Rediscover The Rotary Hoe!**

Farmers rediscover new uses for an old tool

**Land hoe!**

Farmers across the country are taking a new look at an old tool, the rotary hoe. Using a rotary hoe is not only a great defense against weeds, it can also help meet compliance by bringing residue back to the soil surface.

Some innovative farmers have already proven the value of the high-speed rotary hoe in aerating their reduced tillage fields before planting. Used ahead of planting, the rotary hoe breaks the seal or crust that may have formed in the soil. This enables the soil to dry and warm up faster to give you a day or two jump in planting. It also creates a mellow, uniform seedbed for better emergence.

Yetter has designed new models to work specifically in heavy crop residue.

These new models operate in row crops or bedded plants with equal ease and without implement modifications.

In many areas, growers are finding rotary hoes can help reduce wind erosion, while others are using rotary hoes to incorporate broadcasted wheat and other small grains. Taking existing technology and expanding its usefulness is what makes innovators successful.

The usefulness of rotary hoes is not limited to farm fields. You might be surprised, but Yetter Rotary Hoes are being used by ski resorts to break up the crusted snow on downhill ski runs.

Effective weed control and soil aeration can be done quickly

However, even with all these new ideas, don't overlook why the rotary hoe was originally built. Each pass of a rotary hoe can go a long way in reducing herbicide applications by incorporating the herbicide into the weed root zone to enhance its effectiveness. In fact, many preplant herbicide labels call for rotary hoeing if the weather is dry five to 14 days after application. Check your herbicide labels for details.

**NO-TILL SOLUTIONS.**

PEOPLE • PRODUCT • PERFORMANCE

cut your fertilizer costs without reducing your yields

No matter what your tillage practice, the proper placement of fertilizer is crucial. That's why Yetter offers three types of Fertilizer Coulters to place fertilizer right where you need it. They're the perfect set up for cutting your fertilizer costs without reducing your yields.

Make compliance profitable. See a Yetter dealer today your single source for conservation tillage equipment.

**NO-TILL SOLUTIONS.**

PEOPLE • PRODUCT • PERFORMANCE

move only surface residue without moving the soil

The Yetter Residue Manager removes only the residue without digging into the soil. Its adjustable 13 steel wheels with 16 fingers easily push heavy residue away from in front of the planter. This results in a more uniform planting depth and improved seed trench closing for better emergence and quicker stands.

Make compliance profitable. See a Yetter dealer today your single source for conservation tillage equipment.
