## Horst Bros. Poultry Farms Dalton, OH

Introducing the **CHORE-TIME DURAKO** dropping board cage system, 6 rows 4 tiers 464 ft. long with **Chore-Time ULTRAFLO®** feeding system and **Chore-Time's** scraper system. (99,792 layer capacity)

1. ~~You get~~ manure pass through to get cleaner eggs. This is a new dropping board system available with Chore-Time's plastic rails and plywood dropping boards or all plastic dropping boards.

2. ~~You get~~ better water placement. The 16 inch high cage top allows nipples to be placed high to stop accidental triggering and birds waste less water because they reach straight up to drink. There is enough space between tiers to put nipples on stands which allows birds to reach nipples from anywhere in the cage. And the cages are spread out so nipples are in the light plus back away from the feed trough.

3. ~~You get~~ more space for your layers for better production. This cage is 16 inches tall in the front and 12 inches tall in the rear with nothing cut off for a curtain. The front tips out for additional bird comfort.

Chore-Time variable speed rubber finger collector  
Chore-Time dual auger fill system Northeast  
air inlet with stainless hinges

Chore-Time unback top cage P.V.C. dropping  
boards with solid steel scraper sled w/stainless  
blades and cables

Chore-Time Durako cage 16" tall at front and 12"  
tall at back for maximum bird comfort (16"x20" 6  
bird cages) **ULTRAFLO** nipple waterers on stands  
center of cage.

★ Call or write to learn why more Chore-time® cage systems with Chore-time® ULTRAFLO® feeding systems are being installed more often than all other systems combined. And learn how you can produce more eggs on less feed with less maintenance.

★ Layer and pullet ★ contracts available.

Chore-Time 45° bracket with 2x4 step  
rails protects cages and gives easy  
access to top tiers
