MECHANICAL TRANSPLANTER MODEL 1000

For The Grower That Demands The "VERY FINEST"

The High Performance Model 1000

has increased planting speeds 20 to 30%.

OUR PATENTED FLOAT WHEEL DIRECT DRIVE

SYSTEM is the only one of its kind available. This ground driven float wheel moves straight up and down (5-6") at two flotation points. This patented double floating action maintains correct ground contact at all times for both the drive wheel and rear packing wheels letting the units float independently no matter how many rows. No weight of any hitch, toolbar, or water tank is resting on the drive wheel to compact the soil. The wheel just smooths, firms and ideally prepares the soil providing accurate plant placement, proper depth control, and positive spacings from 6" and up in all soil conditions.

Optional Non-Stick Shoes

Double Disc Poly Shoe
