

Brillion DEEP TILLS

penetrate the soil as deep as 18 inches to break up plow sole and hardpan.

Moisture from snow and rain is absorbed deep into the soil. Topsoil is left rough and a certain amount of residue remains to combat wind and erosion.

The SUPER SOIL BUILDER is self-leveling regardless of working depth. Other features include a 4"x4" square tube weighted frame with 20" diameter outer disc blades. The machine depth control hydraulic cylinder is equipped with an adjustable depth stop. Hydraulic hoses to the tractor are included.

X-FOLD PULVERIZERS

The Brillion X-Fold Series Pulverizers are the answer for farm operators who need to cover a lot of ground...quickly. A unique folding mechanism reduces the transport width and height to a manageable size that will pass through restrictive bridges or down narrow roads. With its X-Fold configuration, Brillion is able to reduce transport height well below low-hanging utility wires or tree branches.
