

The Longer You Wait To Control Quackgrass, The More It Will Cost You.

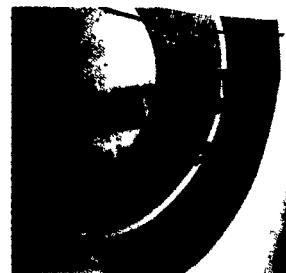

A wise man once said, "He who hesitates is lost." That's why it makes sense to stop quackgrass early with Roundup® herbicide.

WAITING CAN COST YOU MONEY.

Rescue treatments can cost up to twice as much as Roundup. Even then, they don't deliver the same complete, consistent control.

WAITING CAN COST YOU YIELD.

If you wait until your corn is up to control quackgrass, you've already lost yield. In fact, tests show that waiting to control quackgrass can cost you up to 14 bushels per acre. That's because quackgrass is an aggressive competitor for soil moisture and plant nutrients.

DON'T WAIT UNTIL IT'S TOO LATE.

This year, stop quackgrass before it robs you of yield and profit. Ask your dealer for the early, economical control of Roundup herbicide.
