

Farm Forum

(Continued from Page A10)

haulers. We pay for advertising and printing, hats, pens, paper, chairs and desks as well as offices and everything else.

How come I can't afford to pay

my expenditures on my farm? I give them a product to sell for me. All I am doing is creating jobs for someone else and I get all the grief and I can't even afford to buy anything extra. Heads should roll. If my job is not done properly I get ashamed of myself, I am one of the Proud Farmers of America. We have so much pride we are ashamed to admit to anyone

there's a problem. There are a lot of agribusinesses that advertise in your paper that could do a lot better in sales if they would stand up and not be afraid to open their mouths and back the farmers of America. Somebody better get the courage and strength to say enough is enough.

The farmers, however, few that there are today, are the back bone

of this country and our country revolves around us. Do you think it's time we got a better price for our milk so we can get this country revolving again? Anyone reading this letter and starts laughing and trying to put me down in any way doesn't deserve to be a farmer. Farmers have to show how

much bigger we are. Not to fight and ridicule each other and say that someone is trying to cause trouble. If you are still laughing, shame on you, because only you alone control your destiny. If you only knew how few farms are left in our country and how we give our milk away. Please unite your efforts no matter how big you think you are, no matter how much better you pretend to be. Stop hiding behind your computer program. Who cares who's laughing at you. Just remember he's in the same boat as you and he shouldn't be in the boat.

It's time to get the co-ops and processors back to work for us so we can hold our heads up once again and join together to keep the ones laughing at bay. They think we will never unite to one organization. Let's show them how wrong they are. Let's get our money back from co-ops who don't want to fight for a better price for us. We pay the dues so they can have a job.

Let's join together so the N.R.A. members could have a place to hunt! Let's get them behind us. We own the land of America! We are always giving and giving because we like to show people how we were raised with pride and caring about others' feelings.

Giving always feels better than receiving. Anyone laughing yet? I am not afraid to ask for help. If anyone can get the N.R.A. people to help us get the bad wood out of our pockets, please don't be afraid to do it and let me know also. Tell your neighbors and get together. Please UNITE with them. Maybe the Better Business Bureau or some other group can help. But for your own sake stand up and shout for help. Get mad and keep your head. Admit there is a problem. Look your wife and kids in the eyes and shout let's UNITE together across America.

I want to be able to send my kids to college someday and I don't want to send my wife off to work someplace to do it. I don't want to have to put more cows on or build a bigger barn to house them. The answer is getting a better price today, immediately, and changing a few laws to suit "OUR" need for a change. Put the shoe on the other foot and put money in the bank now, or in our local stores, or in our community and keep it in our country.

Change the law! How? By uniting together everyone of us, sort out the Judases and traitor and replace them with one of you. You are smarter than you think. You kept your farm so far didn't you? Maybe some of the people who sold out have some good ideas of who the bad guys are, maybe they can help more than they know.

Please get your confidence back and your courage up and fight. Show each other we can take on the world to make it a better place, let's keep our jobs, our homes, our land and our love for our country. If you are still laughing don't let me know about it.

TOP 10 REASONS

WHY YOU SHOULD BUY A TANCO BALE WRAPPER

TANCO

COMPETITION

1. Five (5) points of support on turntable: Four heavy duty rollers add stability and support to the perimeter of the turntable in addition to the main central shaft. This allows Tanco wrappers to safely wrap the heaviest silage bales on rough or uneven ground.

Competition uses one central shaft to support the entire turntable mechanism

2. Single solid belt on turntable: The single belt enables Tanco wrappers to effectively wrap misshapen or soggy bales providing a positive surface for bale rotation.

Competition uses either no belts between rollers, or multiple belts which can allow bales to sag and slip.

3. Adjustable extendable axle: On trailed models the extendable axle provides a wide, stable wheel base when loading bales. Eliminates the need for counter weights.

Competition must add counterweights or tandem axles as options to effectively handle silage bales

TANCO

COMPETITION

4. Top rollers on turntable: Extra rollers provide security to keep bales in place when wrapping at high RPM's (25) or on uneven terrain.

Competition - None.

5. Unloading ramp on trailed models: The ramp allows bales to be unloaded gently. When a wrapped bale falls hard it can "burp." Once it "burps" the bale does not re-seal. The ramp gives a smooth transition between the ground and turntable.

Competition - optional drop mats or ramps available.

6. Optional "High Rise" axle kit for soft ground conditions.

Compare!

7. Models available to fit every individual need, including machines to wrap big square bales. Tanco was first to build a large square bale wrapper, and continues to produce advancements in bale wrapping technology.

Limited product lines.

8. Positive bale positioning: While being wrapped, bales are rotated the exact distance required to obtain optimum coverage.

Competition uses continuous hydraulic advance. Bales can slip or over-rotate giving an uneven wrap.

9. Durability: Tanco's subframe is one of the heaviest of any machines available in North America. The low profile design keeps silage bales closer to the ground with a low center of gravity for stability. Tanco's features are the result of years of experience and input from hundreds of individual, and commercial users.

Competition - Compare!

10. Price: From a basic 3 point Model AW200, to the trailed Model AW400 with automatic cut & start, bale and batch counter, and tractor seat controls, Tanco prices are very competitive. Pay less for more features and durability than any other bale wrapper on the market.

Competition - Compare!
