**WARNING!**

**An odorless, colorless, invisible--and costly--forage thief!**

You can't see it--and you can't stop it. Storage losses in forage can steal your valuable crop--how much is lost depends upon how you store your feed:

- Tower Silos have Up to 8% loss\*
- Bunkers have Up to 45% loss\*\*

If the average difference in feed lost between tower silos and bunkers is 30%, then storage of 1000 tons will mean 300 tons **MORE** lost in a bunker. If silage is valued at \$30 per ton, the additional losses from bunker storage would be **\$9000 a year.**

For information on losses for all types of crop storage methods, contact the Crop Storage Institute for your free copy of "Methods of Crop Storage" and "Know the Facts."
