"Binkley & Hurst Bros., Your Rotary Hoe Dealer"

Rediscover The Rotary Hoe!

Farmers rediscover new uses for an old tool Land hoe!

Farmers across the country are taking a new look at an old tool, the rotary hoe. Using a rotary hoe is not only a great defense against weeds, it can also help meet compliance by bringing residue back to the soil surface.

Some innovative farmers have already proven the value of the high-speed rotary hoe in aerating their reduced tillage fields before planting. Used ahead of planting, the rotary hoe breaks the seal or crust that may have formed in the soil. This enables the soil to dry and warm up faster to give you a day or two jump in planting. It also creates a mellow, uniform seedbed for better emergence.

Yetter has designed new models to work specifically in heavy crop residue.

These new models operate in row crops or bedded plants with equal ease and without implement modifications.

In many areas, growers are finding rotary hoes can help reduce wind erosion, while others are using rotary hoes to incorporate broadcasted wheat and other small grains. Taking existing technology and expanding its usefulness is what makes innovators successful.

The usefulness of rotary hoes is not limited to farm fields. You might be surprised, but Yetter Rotary Hoes are being used by ski resorts to break up the crusted snow on downhill ski runs.

Effective weed control and soil aeration can be done quickly.

However, even with all these new ideas, don't overlook why the rotary hoe was originally built. Each pass of a rotary hoe can go a long way in reducing herbicide applications by incorporating the herbicide into the weed root zone to enhance its effectiveness. In fact, many preplant herbicide labels call for rotary hoeing if the weather is dry five to 14 days after application. Check your herbicide labels for details.

If You Need A Rotary Hoe, See Binkley & Hurst Bros. For Immediate Delivery!

FOR TOUGH MOWING CONDITIONS DON'T OVERLOOK WHAT BINKLEY & HURST CAN DO FOR YOU WITH SERVICE AFTER THE SALE!

TRY A GEHL DISC MOWER TODAY FROM 3 PT. TO PULL TYPE DISC MOWER CONDITIONERS "IN STOCK"

COST CUTTERS

Gehl has two all new disc mower conditioners to cut your crop down to size, fast and easy. The DC2340 has 7 discs and a 9 foot cutting width, the DC2360 has 8 discs, and a 10 1/2 foot cutting width.

Standard hydraulic tongue makes it easy to position the unit without leaving the tractor seat.

GEHL

A sturdy cutterbar support frame extends beneath the entire cutterbar. This design shields the cutterbar from direct impact with rocks or other field obstructions.

- High speed discs — Each disc has two knives to slice through the toughest crops and conditions the disc gear drive operates in an oil bath for long life.
- Sturdy frame — Cradles the cuttersbar for extra protection and durability
- 540 or 1,000 rpm driveline with equal-angle hitch for smooth power transfer.
