Fast hitch mower & R&L plow for Farmall 200, very good cond. Col Co 717-458-4311 day or 717-458-5542 eve

TOP 10 REASONS

WHY YOU SHOULD BUY A TANCO BALE WRAPPER

TANCO

COMPETITION

1. Five (5) points of support on turntable: Four heavy duty rollers add stability and support to the perimeter of the turntable in addition to the main central shaft. This allows Tanco wrappers to safely wrap the heaviest silage bales on rough or uneven ground.

Competition uses one central shaft to support the entire turntable mechanism

2. Single solid belt on turntable: The single belt enables Tanco wrappers to effectively wrap misshapen or soggy bales providing a positive surface for bale rotation.

Competition uses either no belts between rollers, or multiple belts which can allow bales to sag and slip

3. Adjustable extendable axle: On trailed models the extendable axle provides a wide, stable wheel base when loading bales. Eliminates the need for counter weights.

Competition must add counterweights or tandem axles as options to effectively handle silage bales.

TANCO

COMPETITION

4. Top rollers on turntable: Extra rollers provide security to keep bales in place when wrapping at high RPM's (25) or on uneven terrain.

Competition - None.

5. Unloading ramp on trailed models: The ramp allows bales to be unloaded gently. When a wrapped bale falls hard it can "burp." Once it "burps" the bale does not re-seal. The ramp gives a smooth transition between the ground and turntable.

Competition - optional drop mats or ramps available

6. Optional "High Rise" axle kit for soft ground conditions.

Compare!

7. Models available to fit every individual need, including machines to wrap big square bales. Tanco was first to build a large square bale wrapper, and continues to produce advancements in bale wrapping technology.

Limited product lines

8. Positive bale positioning: While being wrapped, bales are rotated the exact distance required to obtain optimum coverage.

Competition uses continuous hydraulic advance Bales can slip or over-rotate giving an uneven wrap

9. Durability: Tanco's subframe is one of the heaviest of any machines available in North America. The low profile design keeps silage bales closer to the ground with a low center of gravity for stability. Tanco's features are the result of years of experience and input from hundreds of individual, and commercial users.

Competition - Compare!

10. Price: From a basic 3 point Model AW200, to the trailed Model AW400 with automatic cut & start, bale and batch counter, and tractor seat controls, Tanco prices are very competitive. Pay less for more features and durability than any other bale wrapper on the market.

Competition - Compare!
