## Cattle Industry Development Committee

HARRISBURG (Dauphin Co.) - The Pennsylvania Cattle Industry Development Committee, a panel of leaders from all segments of the beef industry, has released its recommendations on the development of a plan to enhance Pennsylvania's beef industry.

The Cattle Industry Development Committee, which was organized and staffed by the Beef Council, adopted two leverage points (strategic points of impact) and outcomes (desired results) that will improve the viability and profitability of Pennsylvania's beef industry. The leverage points identified, and desired key results were: 1) Business Climate: Create a more favorable economic and environmental/regulatory climate; 2) Production Efficiencies: Improve the education and information delivery regarding the economic uses of production resources.

To address the desired result within the business climate, the Beef Council, in cooperation with -Penn State Ag Economics Department and the Department of Agriculture, is assembling information for a quantitative analysis of the economic contributions of the cattle industry to the state's economy. The statistical data obtained will then be used to develop an informational kit which can be used by farmers, the extension service, and others for public and civic presentations.

The Production Efficiencies leverage point consists of three phases: In Phase One, the objective is to enhance feedlot management and profitability. The objective of Phase Two is to strengthen dairy-beef production systems while Phase Three will address Pennsylvania's beef cow-calf production systems. A feedlot management forum is scheduled for July 7 for the state's largest cattle

While the committee's recommendations provide an aggressive plan of action, the enhancement of Pennsylvania's beef industry will require the coordination and communication of all segments of the industry.

The Pennsylvania Cattle Industry Development Committee members are Bob Hay (cow-calf producer), Paul Espy (cattle feeder), Ralph McGregor (dairy producer), Michael Silverberg (Moyer Packing), Tom Taylor (Taylor

Packing), Stan Curtis (Penn State), John Comerford (Penn State), Phil Kimmel (Farm Credit), Albert Murry (Lebanon, Valley

National Bank), John Vogel, (Pennsylvania Farmer Magazine), Richard McDonald (Pennsylvania

Dept. of Agriculture), and Dave Ivan (Beef Council) committee staff liaison.

# The heavy-duty BlueMax® stands up to

If you push your high-capacity silo filling equipment to the limit, or use a custom filler who does, you're going to need the heavy-duty strength of Level-Flo's BlueMax® Multi-Flo® silage spreader. It has heavier metal at wear points and is reinforced all around to give you years of dependable service.

And because it's a Multi-Flo, the BlueMax will pack your silo tight, right to the top. Carefully engineered Multi-Flo silage spreaders have few moving parts. They are the first choice of farmers because of extreme efficiency and high reliability.

## Poly Square Means Healthier Calves All-Season Big Foot 5'x7'6"

The Poly Square Big Foot is constructed of Opaque material to eliminate the solar effect. It blocks out sunheat-not sunlight. Poly Square's inverted ribs and 5'(W)x7'6"(L) make it the biggest unit on the market today and extremely wind resistant. It has no pop rivets which means no breaks or cracks for snow and rain to sift in. The unit weighs 100 pounds plus manger & buckets. And Poly Square Big Foot is large enough so your calf can lay in the center, away from cold walls in the winter. Use Poly Square with our side feed station and bottle holder which is perfect for use with a fence in a more traditional setting.

New Side Hay Feeder - Made especially for Poly Square Big Foot, no other unit has this feature. Also has a center roof vent for better air movement. Also Available: Poly Domes, Silo Chute Hoppers, Silo Chute Liners
