Big-Jim Unloader...The Unloader of the Future...Available Today.  
For 20' - 24' and 30' Silos, With the Possibility of 40' diameter Silos:  
Think of Storing 5,000 Tons in One Tower Silo!

**"IT'S A WHOLE NEW WORLD OUT THERE!"**

Tower silos that can hold 4,000 tons of forage!!! This is one of the first major changes in the silo industry since the 1950's when farmers went from 12' and 14' diameter silos to 20' and 24' diameter silos. The industry met the challenge. And Now, Sollenberger Silos Corp. is stepping up to meet the challenges of the '90's and beyond. The larger dairies need storage units that will hold 2,000 tons and more, and be able to deliver the feed without spending "Hours Per Day." The poured concrete tower silo is the silo to store the feed, and the Big-Jim Distributor/Unloader is the system to deliver the feed. Today's business-oriented dairymen realize that "Forage Quality is often the single most important factor affecting their profit," and as a result they are searching for ways to store the feed, and deliver it to the cow in the best condition possible. "The tower silo may very well be the best investment that a dairy farmer can make!!"

Store your feed in a poured concrete silo, let gravity do the packing, and deliver the feed directly into your truck or mixer. "Save \$20,000 or more per year on machinery and labor costs to store and deliver your feed, compared to bunker silos."

The tower silo may cost more, but labor, machinery, and feed quality savings will pay the difference in 3 years or less. "The Blizzard of '93 and the severe winter of '94 greatly increases your appreciation of the concrete tower silo."

It is time once again to get serious about storing your valuable feed.

MEMBER: International Silo Assn. - Am. Society of Agric. Engrs. - PA. Forage & Grassland Council

CALL FOR AN APPOINTMENT TO DISCUSS YOUR STORAGE NEEDS AND ASSISTANCE IN COMPLETING THE "COST ANALYSIS WORKSHEET" DEVELOPED BY THE CROP STORAGE INSTITUTE  
Bob Francis (717) 264-9588

**JUST COMPLETED...This 30'x100' poured concrete silo with drive-thru for loading directly into your mixer wagon or truck-mounted mixer. The Big-Jim System will deliver over 1000 lbs. per minute of corn silage. Just think...you don't need 6 silos and 6 unloaders to store this much feed...and better yet, you do not have to store your valuable feed on the ground and try to protect it with plastic and used tires!!!**
