## HI-LO Pan Feeder

Used by "Flood Feed"  
Improve Feed Conversion

### A TWO-STAGE PAN

The first 7-10 days of a broiler's life are critical. The eating habits they develop then establish their growth pattern for life. For those very young birds the Cumberland HI-LO Pan Feeder, resting on the house floor, presents a lip height of 2.1" (the average height of traditional "chick lids") Because they can easily and safely get in and out of the pan, they're eating out of the pan from day one. And because the pan needn't be "Flooded," they're getting only fresh feed and only as much as they need.

Then as the birds grow, and the feed line is raised, the Cumberland HI-LO Pan Feeder E-X-P-A-N-D-S into a 3.5" deep adult bird pan! The higher wall and feed saver lip prevent waste from raking and billout and cause the birds to eat nearer the outside edge of the pan, assuring a more even "first in, first out" utilization of feed (which also saves feed and maintains freshness).

### Use Fluorescent Lighting For Energy Savings

## U-TUBE LAMP & SUPPLIES

...the biggest advantage of these lamps is the economic savings over the life of the bulb. Once the initial investment is paid back, which will be done in less than six months, the increased electrical economy makes such bulbs the most logical way to light... MICHAEL J. Duro - PhD Animal Science University of Connecticut

## PHILIPS EARTH LIGHT

ENERGY EFFICIENCY AND LONGER LIFE

Earth Light Collection lamps pay for themselves many times over by providing significant savings on energy, maintenance and replacement. Compared to ordinary incandescent lamps, Earth Light Collection lamps save up to 76 percent on energy. The SLS23, for example will save \$47\* over the life of each lamp. What's more, these energy savings are compounded by savings on maintenance and replacement. With an average life of 10,000 hours, Earth Light Collection lamps last up to 10 to 13 times longer than ordinary incandescent lamps.

## Sensaphone 1100

### Advanced Desktop Monitoring System

Environmental/Process monitoring over telephone lines with full programming capabilities

- The versatile Model 1100 is designed for programming flexibility. A variable power failure recognition and listen-in tone with alarm disable, security code access, remote sensing, and other programming features.
- Monitors power, temperature, and other important environmental conditions to protect computers, equipment, and processes. Automatically contacts you at up to 4 locations if unsafe conditions occur.

Allows you to contact your system using any telephone, to receive status reports and listen in on site sounds.

Helps you detect problems before they turn into disasters.

Now you can protect your equipment and processes even when you can't be there. The Sensaphone 1100 monitors your computer rooms, equipment centers, offices, or any unattended facility to detect power failures, temperature extremes, intrusion, water intrusion, sounds such as smoke and burglar alarms, and other conditions of your choice. Auxiliary temperature input lets you monitor isolated processes such as freezers and refrigerators while the unit remains in a separate room.

Alerts you immediately if problems arise. The Sensaphone 1100 automatically contacts you by phone at up to four different phone numbers, to alert you of unsafe conditions. The system communicates in voice synthesized English and even lets you listen in on actual on-site sounds.

**CONDITIONS MONITORED:**

- Temperature
- Humidity
- Electricity
- Water Intrusion
- Smoke
- Sound
- Windows & Doors
- ...and more!

**ALERT**

UP TO 4 DIAL OUT NUMBERS  
It's easy to set up the Sensaphone 1100. You can dial out to up to 4 different phone numbers at the same time. You can also dial in to the system with your own phone to check on the status of your system.

COMMUNICATES OVER STANDARD PHONE LINES  
Call in 1-800-555-2100, back to all monitored units, or call in 1-800-555-2100. The Sensaphone 1100 is a standard single line unit.

## ENERGY EFFICIENT ENCLOSED MOTORS

- Heavy-duty totally enclosed motors with sealed ball bearings are designed for continuous work load
- Available in two-speed
- Built in thermal overload for low line-voltage protection on all single phase motors

## ALUMINUM SHUTTERS

- All Aluminum Construction
- Counter Balance Blades
- Nylon Bearing
- Stainless Steel Hinge Pins
- Low Air Resistance\*
- Reduces Sticking in Dusty and Moist Conditions\*
