JOHN DEERE BALERS DELIVER CONSISTENCY, CONSISTENTLY

Building "square-er," stackable, solid bales is what our proven hay control system is all about.

Once hay is inside the baler, a continuous-flow, floating auger moves the crop into a tapered chamber... precompressing the hay before it reaches the bale chamber. This makes John Deere bales denser, and more consistent. A difference you'll notice when stacking and feeding bale after John Deere bale.
