- Brady 7 Ft. Flail Chopper **\$2,500**
- Danuser 3 Pt. Post Hole Digger **\$680**
- Shaver 3 Pt. Hydraulic Post Drive **\$2,500**

Level your fields without leveling your combine.

The brilliantly simple Dynamic Hillside Compensation System, optional on MF 8400 conventional combines, gives you "flat land" performance on slopes up to 20 degrees. All automatically. And all at a surprisingly low cost. Stop in today for all the details.

Without Hillside System, crops overload the lower side of the sieve, causing high losses and low sample quality.

With MF's Hillside System, crops are automatically spread evenly across the sieve for top performance.

MASSEY FERGUSON

Massey Ferguson products are distributed throughout North America exclusively by AGCO Corporation Duluth GA

THE CLAAS HARVESTER

MAXIMUM FEED QUALITY

To ensure maximum feed quality from corn it is vital to crack every kernel. Digestion of uncracked corn falls as the corn becomes drier. Independent trials have shown the Claas corn cracker to be close to 100% effective. From the cylinder the corn passes through the two large diameter rollers with saw tooth profiles. The rollers run at different speeds to intensify the grinding effect and open up each kernel. It is a fairly tough process so the latest generation of corn crackers take account of the wear involved on the rollers. Nothing can reduce the wear but Claas have cut the cost of repair by making the outer sleeve replaceable. The shaft, drive pulley and bearings can all be reused which cuts down repair bills dramatically. Adjusting the distance between the two rollers is accomplished by turning two handles, easily accessible behind the cab. In no time at all the degree of cracking can be matched to the ripeness of the crop.

RELIABILITY

The CLAAS Cutterbox is a unique balanced design using 2 knives in a V configuration. This forces the cutting action toward the center instead of the outside. This is the secret of their horsepower requirement and good quality of cut.
