**WHAT'S WRONG WITH THEIR HARVESTING SYSTEM IS WHAT'S RIGHT WITH OURS.**

We all know that the shortest distance between two points is a straight line. And when it comes to harvesting your crop, it's also the most gentle. So our Natural Flow Harvesting System does just that. We mounted the cylinder transversely. This means, that, unlike other combines, your crop never changes direction. And that means that there's less chance of crop damage. Even the unloader tube has been designed so there are no right angles, but a smooth, gentle flow of your crop as it's sent on its way, in a straight line, the best way. The GLEANER® way. See it at your GLEANER dealer now.
