AIRSTREAM
A.T. NEWELL

VENTILATION CONTROLS

...operates curtains on cable system by winching cable around a grooved drum controlled by a thermostat and time clock.

The model AC506S version uses a sprocket and chain drive (instead of drum) that turns a pipe running the length of the building to pull the curtain or door drop cords directly around the pipe eliminating need for cable (operates same as AC506).

CEILING INLETS

Each unit provides 1.2 square feet of intake area and is designed to operate under negative pressure. Inlets are constructed of fiberglass composite and Styrofoam. Units measure 16.5" square and mount directly into the ceiling and project into the attic. An insulation-stop is provided. Stainless steel counter weights and a manual lock adjustment make it unsurpassed in performance.
