### HOG EQUIPMENT

**\$ VALUE LEADER \$**

#### PIG SAVER "DUTCH CRATE"

Developed through testing in our research farms the goal was to develop a crate that nearly eliminates crushing, due to lay one, unmatched durability and be easy to work around. All this has been achieved by a unique gravity fill-pail that forces cows to lie down slowly and using stainless steel for rear doors and legs, proven horizontal and solid steel rod construction. All this at a reasonable cost. Crates also can be installed on an angle.

#### CONFINEMENT STALL

Developed recently in our R&D farm. Our goals were convenience, safety and durability. The low back and flat top rails are easy to reach over with no sharp edges. Stainless steel rear legs and front feet along with solid steel horizontal rods through punched uprights provide the strongest, most durable stall ever produced by Tri-County (21" x 24" O.C. x 86")

#### NURSERY PENNING

Nursery penning has been improved by the use of an optional solid stainless steel panel on the front gates which keeps walkways clean. Stainless steel verticals on penning eliminates corrosion where penning attaches to the floor. Stainless steel drinker pipes & mounting brackets also increase durability.

#### FINISHING PENNING

Optional stainless steel verticals and fasteners offer improved durability over other similar types of penning. Loop and flapper latch arrangement eliminates the use of drop pins. Stainless steel fence line feeders provide excellent durability and a minimum of waste.
